

# HARNESS THE POWER.

**CORE PROTECTION YOU  
CAN TRUST.**

Robust penetrating oil that protects  
wire threads.

# WHEN THERE'S A LOT ON THE LINE, SCHAEFFER HAS THE ANSWER.

Rapidly penetrates to the wire rope's core.

Tenaciously clings to wire threads.

Prolongs the life of wire ropes.

Delivers strong protection against rust and corrosion.

Maintains consistency in all temperatures.

## Heavy-duty performance in all conditions

Silver Streak® Wire Rope Lubricant easily sprays on and leaves a pliable, transparent film that makes it easier to inspect the condition of the wire rope. However, don't let its light color, shear spray fool you. Silver Streak® Wire Rope Lubricant is highly resistant to chipping and peeling in cold weather, and it resists drying out with heat.

Working in humid environments or areas where water is present? Silver Streak® Wire Rope Lubricant displaces moisture from threads and exterior surfaces and forms a protective barrier against moisture. You get solid protection from damaging rust and corrosion for longer wire thread life.

## Fast-acting, thorough protection

Silver Streak® Wire Rope Lubricant rapidly penetrates to the core of the wire rope and lubricates each wire thread. Its robust formula allows it to protect the outside from corrosion and the inside from friction and wear. Working with heavy loads in demanding conditions? With Silver Streak® Wire Rope Lubricant, wire rope is protected against metal-to-metal contact as you lift, pull, drag and hoist loads.

## Powerful one-two punch

Applications such as mining shovel cranes and draglines that are safety-critical will benefit from applying Silver Streak® Wire Rope Lubricant first for its quick penetration, followed by our Silver Streak® Multi-Lube for added protection against contaminants.

Working under stressful conditions? We can take it.
