It's the Cost to Use

## Bottom Line

### THE BOTTOM LINE

Schaeffer's #167 Full Synthetic Gear Lube Drops Temps, Solves Overheating Problem; out performs Mobil 1 and Amsoil!

### THE COMPANY

Huntsinger Farms, Inc. in Wisconsin

### THE STORY

Huntsinger Farms, Inc. grows horseradish that is sold worldwide under the Silver Spring brand. Mark Brown is the farm's Head of Maintenance.

Mark Brown was having significant heat related issues with the wheel hubs of his horseradish harvesters using a non-synthetic gear lube; so he decided to give Mobil 1 Full Synthetic Gear Lube a try. After a month, nothing had changed. At that point, the wheel hubs were so hot after a long day of harvesting that he couldn't even touch the wheel hub without burning his hand.

Next, Mark tried Amsoil Full Synthetic Gear Lube to see if it could lower the temperature. After about a week of running the Amsoil, the temperatures in the wheel hubs (at the end of the day) was actually **hotter** than with Mobil 1!

**That's when Mark gave Schaeffer's #167 Full Synthetic Gear Lube a try.** It didn't take long for Mark to notice a significant difference. In a few days he was actually able to REST his hand on the wheel hubs (after a long day) without getting burned! **Mark said he has never had a problem with the wheel hubs overheating since switching to Schaeffer's Gear Lube!**
