

### 131 Neutra™ Fuel Stabilizer

Neutra is our best fuel additive for all types of combustion engines (gasoline-diesel-LP). It neutralizes the harmful effects of sulfuric acid that is a by-product of the combustion process. It increases fuel economy an average of 5 - 10%, cleans injectors and replaces lost lubricity in low sulfur fuels (also is a lead replacement in gasoline). Rate: 2-4 quarts per 100 gallons of fuel. Also available with Cetane booster for faster start up and more power. Specify 192 Neutra Plus (for diesel only). With flow improver, specify 192WND (for diesel only). Not recommended for use in on-highway diesel fuel.

### 743 AirTight Tire Sealant

AirTight is a premium, heavy duty, preventive maintenance tire sealant formulated especially for commercial and industrial tires that are subject to hard, heavy use. AirTight seals punctured tires with a permanent seal. It will virtually eliminate flat tires from tread punctures, bead, rim, porosity and tire and wheel related leaks. The special chemical makeup allows AirTight to stay fluid, allowing it to seal any puncture or leaks immediately. AirTight will prevent flats from punctures up to 3/16", save fuel, and increase tire life. The result will eliminate casing damage, and keep your equipment running, eliminating costly down time. A must for anyone who must keep their equipment going.

### 293 Supreme Gear Lube

Supreme Gear Lube is famous for its ability to carry heavier loads and reduce frictional wear. Gears run cooler and for longer periods of time. The presence of the Moly "plating" on all moving parts minimizes the action of cold welding which occurs when gears have been standing idle. In many cases, seal leakage is retarded or stopped. Exceeds requirements for GL-5, MT-1 and PG-2 Dana-Spicer, Ford, GM, Daimler Chrysler, Mack GO-H, Rockwell 076-A, 076-B, 076-D, 076-E, Eaton Axle, Volvo, Volkswagen, Clark MS-8 REV-1 specifications.

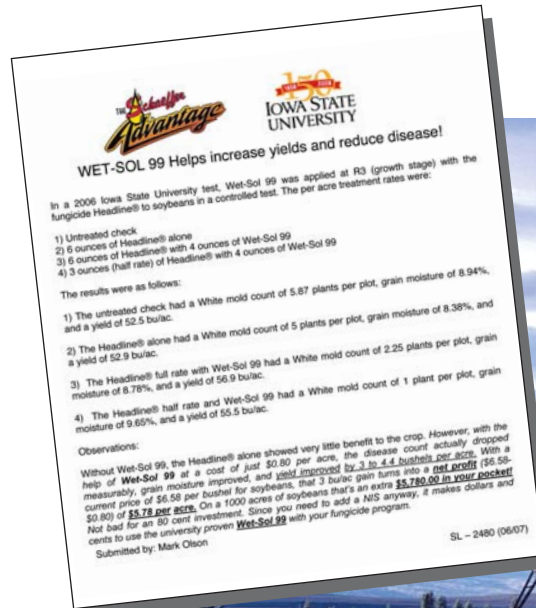

### 233 Wet-Sol®

Plants depend on a steady and effective flow of water to survive. Water carries to the plant life-giving nutrients and fertilizers. If water runs off, evaporates or fails to penetrate or leaches out the plant will starve and have a smaller yield.

Wet-Sol is a non-ionic surfactant recommended for use as a soil penetrant and as a spreader-sticker. Schaeffer has developed a special blended formula of different surfactants to give an improved performance compared to most competitive brands that only contain straight grade or single surfactant. It breaks down the various forces that can interfere with the ability of water to carry plant nutrients, fertilizers and chemical sprays. Wet-Sol also reduces evaporation and improves moisture retention. It aids in breaking down compacted soil and increasing water penetration. Wet-Sol makes water wetter and able to do its job of delivering life-giving nutrients to the plant. For 99% active concentrate, specify 235 Wet-Sol 99.

**Wet-Sol is ideal for irrigated and non-irrigated crops, as well as all kinds of turf and landscapes.**

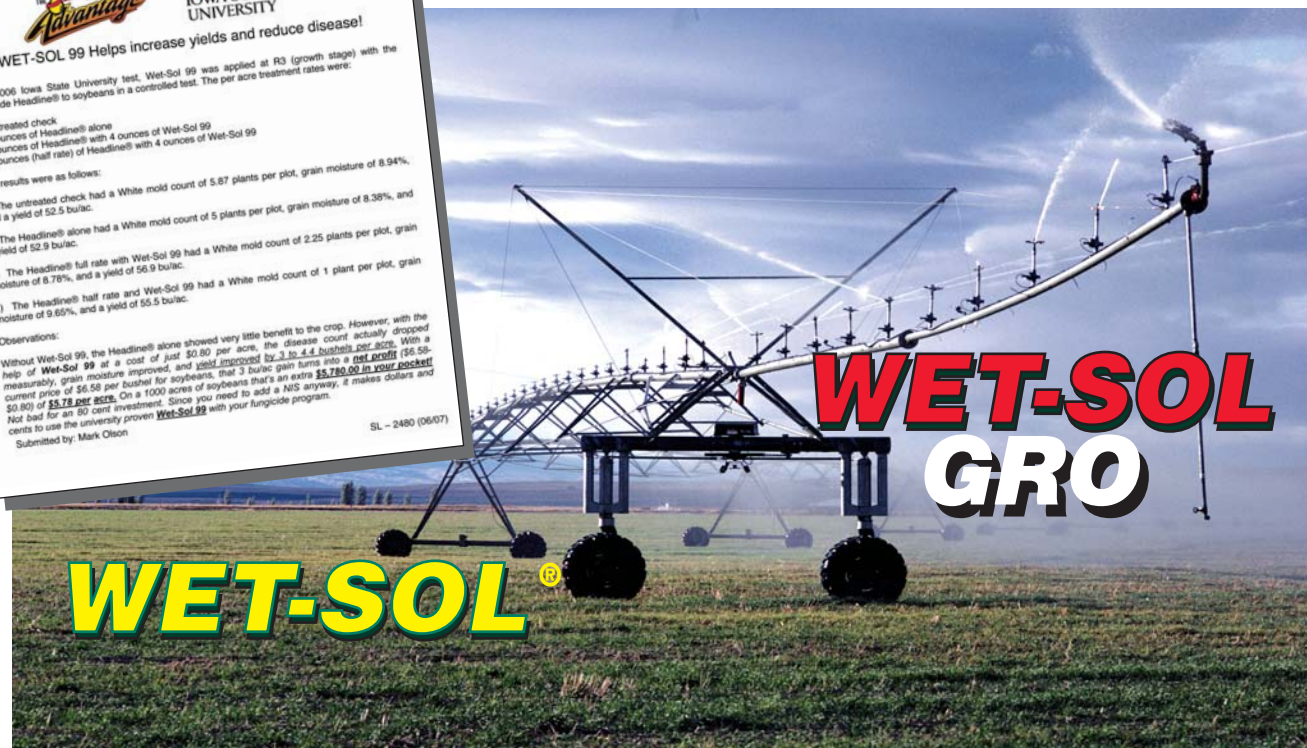

### 233G Wet-Sol Gro

Wet-Sol Gro is a unique blend of feeding supplements blended with Wet-Sol to create a special way to increase crop yield which will maximize your fertilizer dollar and increase your profit margin.

Water is the life blood of plants but water molecules have a tendency to cling together and inhibit water's ability to spread evenly or thoroughly when sprayed. It also prevents water from penetrating compact soils. Wet-Sol Gro solves those problems and enables the feeding supplement to go to work beneath the soil surface. They gather and store water and nutrients.

Wet-Sol Gro's commercial use, plus extensive university research has proven that Schaeffer's unique product, Wet-Sol Gro will increase soil mellowness, crop yields and crop quality by improving the movement of water into the soil and increasing the size of roots, root hairs, and hyphae. When Wet-Sol Gro is applied directly to the soil it helps plants develop a miniature pipeline to the root system. This pipeline gathers and stores water and nutrients that are supplied directly to the root hairs helping the plant to thrive.

**The results:  
Improves plant growth  
Improves resistance to stress  
Improves plant production**

**AGRICULTURAL  
SUPREME LINE**

**Dedicated to supporting  
the agriculture industry**

**No Challenge Is Too Great For**

**"It's not the cost to buy... it's the cost to use."**

For over 160 years, business and industry have come to rely on Schaeffer's Specialized Lubricants to handle the really tough lubrication jobs. That's because of the risk involved in using something less than the best.

Schaeffer's has a proven track record for providing lubrication solutions for mining, trucking and agricultural customers. Our customers have grown to trust Schaeffer's for the performance of their valuable equipment. It's not the "cost to buy, it's the cost to use" that matters.

**We believe that once you've used Schaeffer's, you'll never trust anything less.**

**700 Supreme 7000 15W-40 Synthetic Plus Motor Oil**

Supreme 7000 is a para-synthetic motor oil that contains Micron Moly®, a proven friction modifier that improves fuel economy, reduces engine wear and increases engine life. Schaeffer's Supreme 7000 is formulated using a special additive package that exceeds gas and diesel engine manufacturers' requirements. Exceeds requirements for API, CJ-4/CI-4/SM, CI-4 Plus, Mack EO-O Premium Plus 07. Also available in SAE-30 (specify 702), 10W-30 (specify 703, for gasoline engines only), 5W-30 (specify 701, for gasoline engines only), and 20W-50 Racing Oil (specify 705).

**139A SoyShield® All Season**

SoyShield combines the superior lubricity of Soy (3 times lubricity of petroleum) with the advanced additive chemistry of Diesel Treat 2000. Recommended for use in ultra low sulfur, low sulfur and high sulfur diesel fuels. Treatment level: 1 gallon to 500 gallons of fuel. Contains cold-flow improver and de-icer.

**238 Ultra Supreme Extreme Pressure Grease**

**Bearing & Chassis Lube**

Ultra Supreme withstands greater shock loads and normally lasts two to three times longer than ordinary greases. Ultra Supreme is a completely waterproof lubricant with the addition of extra MoS<sub>2</sub> and has proven to successfully reduce wear on all types of anti-wear friction bearings and chassis points. Waterproof/Hi-Heat. Available in #1, #2, #3.

**190 Penetro 90®**

Penetro 90 is a high performance penetrating oil that effectively lubricates all types of moving parts. This unique patented formula contains special friction releasing additives that deposit a long lasting film to greatly reduce friction and wear. It protects against moisture and prevents rust formation and other corrosion that damages working mechanisms. Penetro 90 frees frozen bolts and sticking linkages, and is an excellent lubricant for valves, conveyers, rollers, hinges, locks, cutting tools and electric and air power tools. Also available in a food grade non-aerosol version (specify 190E).

**315 Simplex Supreme Torque Fluid**

Simplex Supreme Torque Convertor Fluid is a universal para-synthetic transmission-hydraulic fluid. Because it contains a top-of-the-line additive package, it exceeds almost all tractor manufacturers' requirements. Simplex Supreme is a universal torque fluid that exceeds John Deere, Case-IH, Case-New Holland (CNH), and Allis Chalmers specs. Also available in non-para-synthetic (specify 115).

**258 Clean & Cool**

Clean & Cool is a new generation coolant treatment that protects the engine's cooling system from rust, pitting, corrosion, electrolysis and scale deposits. It provides maximum cooling efficiency in all closed cooling systems and is recommended for both gasoline and diesel engines. Clean & Cool is highly concentrated to reduce cost. Treatment level: 1 pint to each 8 gallon cooling system capacity.

**227 Moly Roller Chain Lube**

Moly Roller Chain Lube is compounded with a lighter viscosity mineral oil to act as a carrier for molybdenum disulfide. This enables it to penetrate to the pins and bushings, carrying the moly to the inner workings of the chain. This oil is light enough to dissipate, without collecting dust. Customers say they have tripled the life of their roller chains using Moly Roller Chain Lube.

**163 Rustop Outdoor**

Rustop Outdoor is a rust preventative for long-term protection of metal parts and equipment stored outdoors. It is highly resistant to moisture, salt spray and high-humidity conditions. Rustop displaces water and moisture, leaving a soft, transparent, protective film.
