

**It's not the Cost to Buy
It's the Cost to Use**

Bottom Line

THE BOTTOM LINE

Schaeffer's #238 Moly Supreme and #209 Moly Universal Gear Lube cut costs and grease consumption in quarry operation.

THE COMPANY

Alby Quarry – Alton, Illinois

THE STORY

Jerry Eichen, Maintenance Supervisor at Alby Quarry recognized there were differences in grease and was using three different greases throughout the operation. After seeing the demo they started using Schaeffer's #238 Moly Supreme on their crusher and in other parts of their operation. They are now using Schaeffer's grease in all areas of the operation. They have cut their grease consumption by 60%, bearing losses in their conveyers is 0, and it costs 2/3 less than some of the grease they were using.

Alby Quarry is also using Schaeffer's #209 Moly Universal Gear Lube in their vibrator screen, which has cut their use by 75% due to less leakage. Their employees really like the grease because it takes fewer pumps in their daily greasing of the equipment. Their only complaint is that it now takes 1 ½ to 2 minutes longer for the crusher to shut down at night before they can service it.

Jerry Eichen, Maintenance Supervisor at Alby Quarry
