

**PENETRATES.
LUBRICATES.
PROTECTS.**

Stuck with rust?

Busts through rust and lubricates moving parts that have become difficult to operate.

HAVEN'T MET A STUBBORN BOLT WE DIDN'T LIKE.

Triplies the life of hoist chains and sprockets.

Frees stuck and rusted parts.

Protects against corrosion, rust and abrasive particles.

Greatly reduces friction and wear.

Doesn't affect seal materials or coatings.

Busts through rust, prevents thread stripping

Wear, corrosion, sludge and grime are no match for Penetro 90[®]. When sprayed onto rusty bolts, Penetro 90[®] lubricates each rust particle and acts like tiny ball bearings, allowing the rust particles to easily slide over each other. Penetro 90[®] busts the rust from the threads, and stubborn bolts loosen and release with ease.

Triple protection against rust

Penetro 90[®] contains three rust and corrosion inhibitors, allowing it to quickly penetrate deep into the pores of metals and create a highly durable shield against rust and corrosion. This protective barrier also rejects abrasive particles and seals out moisture to provide lasting protection to the bolt's threads.

Triplies time between applications

Solvent-based penetrating oils evaporate quickly, require frequent applications and have a strong odor. Not Penetro 90[®]. Its oil-based formula allows it to coat metal surfaces with a light, clear, low odor lubricating film that lasts. Even in high moisture conditions, Penetro 90[®] resists washing off, and keeps metal surfaces protected.

One product, many uses

Penetro 90[®] is recommended for valves, taps and dies, hinges, linkages, cutting tools, locks, conveyors, air power tools, control cables, rollers, hoist chains, electric power tools, heim joints, wheel studs and weight jack bolts. For heavily corroded parts, first scrape or wire brush, and then allow Penetro 90[®] a short time to penetrate.

Stubborn, rusted bolts? Grab Penetro 90.
