

Reduces grease usage by 25%

**Royal Scott Golf Course
Lansing, MI**

Anthony Spinelli, maintenance technician, did a test in one of their Toro Reelmasters using Lucas Xtra Heavy Duty Grease in a few reels and Schaeffer's SynForce™ Green Grease in the rest. When he removed the reels for sharpening, Anthony was surprised to see SynForce™ Green was not falling out like the Lucas grease.

The reels serviced with the Lucas grease also had pitting on the bearings, which can happen when grease emulsifies with water. That kind of wear and tear can lead to unplanned downtime and expenses.

They normally shoot three to five shots of grease a month. With SynForce™ Green, Anthony says they've reduced grease usage by 25 percent.
