trucks from
fuel gelling;
reduces grease
usage, saves
\$3,500**

Motor Carrier Service (MCS)

Northwood, Ohio

Operates a fleet of 100+ company-owned, over-the-road late model trucks.

MCS started using Schaeffer's products in late 2009, and it's clear to see they're happy with the results.

Eliminates bacteria contamination

In 2010, MCS was experiencing fuel issues with their 20,000-gallon underground tank. Using Schaeffer's Fuel Doctor test, they discovered the tank had bacteria, fungus and moisture. MCS then treated the tank with Schaeffer's Fuel Shock and Tank Dry to cure the problem. As a preventative maintenance measure, MCS now tests their tank once a year, and the results always look good.

Reduces fuel gelling

After researching fuel additives, MCS' parts and supplies manager decided Schaeffer's Diesel Treat 2000™ fuel additives were the right choice. MCS says their drivers see improvement in truck performance as well as fuel economy, though they've not documented fuel savings.

The winter of 2014 truly solidified MCS' decision to use Schaeffer's fuel additives.

It was one of the coldest winters in years in their part of Ohio, but their fleet withstood the frigid temperatures. Compared to competitors in the area who had as much as half their fleet down at times, MCS kept on trucking. According to MCS, other trucking companies kept their trucks idling when not in use, but it wasn't necessary for them, producing big fuel savings.

The only gelling issues they experienced occurred when trucks got their fuel over the road. Fortunately, Schaeffer's Diesel Hotline quickly dissolved the gel with minimal effort.

Reduces grease usage by half

MCS was using a major brand's grease, content with the results. However, after hearing how much grease they were going through, their Schaeffer rep convinced them to try Schaeffer's grease. The first barrel of Schaeffer's Moly EP Synthetic Plus Grease lasted 12 months; the second barrel lasted 9 months. Compared to the 2-4 barrels MCS was using in the same amount of time – Schaeffer's grease is saving them \$3,500.
