

STICKS AROUND LONGER.

SPRAYS THICK.
Vertical, sideways and upside
down—we got you covered.

SERIOUSLY ADHESIVE. HIGHLY PROTECTIVE. ALL SCHAEFFER.

Excellent wear protection against extreme pressures.

Will not harden, chip or flake off or form a hard-pack buildup.

Maintains film strength for longer performance.

Strong resistance to rain, snow and water washout.

Lasts long in dirty, wet and hot environments.

A barrel of durability in every can

Gears operating under heavy loads and slow speeds need a lubricant that can withstand the weight of the work. Silver Streak® Multi-Lube Spray delivers the durability needed for longer gear life. It delivers lasting, heavy-duty protection in all environments to keep metal surfaces safe from wear and tear. Silver Streak® Multi-Lube Spray is especially ideal for dirty and wet environments.

Silver Streak® Multi-Lube Spray is reinforced with molybdenum disulfide and various solid lubricants, which strengthen its film strength and load carrying capabilities. It's highly adhesive, and it clings to gear teeth with unparalleled tenacity. Even on vertical surfaces in dirty and wet environments, Silver Streak® Multi-Lube Spray stays in place and sticks around. As Silver Streak® Multi-Lube Spray plates to metal surfaces, it forms an almost indestructible film that provides a cushioning effect to gears and metal surfaces.

Maintains consistency for longer lubricant life

Demanding conditions are no match for Silver Streak® Multi-Lube Spray's unique formula. It remains soft and pliable over wide temperature ranges, resists washout from snow and rain and resists adhering to dirt and dust. You get strong, dependable performance that delivers like only Schaeffer can.

Recommended for open gears, pins and bushings, dipper sticks, circle rails, wire ropes and large open chains found in industrial applications.

Powerful one-two punch

Applications such as mining shovel cranes and draglines that are safety-critical will benefit from applying our Silver Streak® Wire Rope Lubricant first for its quick penetration, followed by Silver Streak® Multi-Lube for added protection against contaminants.

Superior performance in industrial applications.
