## SAFETY DATA SHEET

266LV Citrol ${ }^{\circledR}$ Low VOC (Spray)
Good people. Great products.

## Section 1. Identification

GHS product identifier

| Other means of <br> identification <br> Product type | $:$ Not available. |
| :--- | :--- |

Relevant identified uses of the substance or mixture and uses advised against

| Identified uses | Water soluble degreaser. |
| :---: | :---: |
| Supplier's details | Schaeffer Mfg. Company 102 Barton Street Saint Louis, Missouri 63104 Tel: 314-865-4100 Fax: 314-865-4107 Toll Free: 1-800-325-9962 E-Mail: safety@schaefferoil.com Web: http://www.schaefferoil.com |
| Emergency telephone number (with hours of operation) | +1 314 865-4105 (24-hour response number) |

## Section 2. Hazards identification

OSHA/HCS status
Classification of the
substance or mixture
GHS label elements
Hazard pictograms
Hazard pictograms

Signal word
Hazard statements
: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
: FLAMMABLE AEROSOLS - Category 1
SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
SKIN SENSITIZATION - Category 1
AQUATIC HAZARD (ACUTE) - Category 2
AQUATIC HAZARD (LONG-TERM) - Category 2
:

: Danger
: Extremely flammable aerosol.
Causes serious eye irritation.
Causes skin irritation.
May cause an allergic skin reaction.
Toxic to aquatic life with long lasting effects.

## Section 2. Hazards identification

## Precautionary statements <br> Prevention

Response

Storage
Disposal
Hazards not otherwise classified
: Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Avoid release to the environment. Avoid breathing vapor. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Pressurized container: Do not pierce or burn, even after use.
: Collect spillage. IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.
: Protect from sunlight. Do not expose to temperatures exceeding $50^{\circ} \mathrm{C} / 122^{\circ} \mathrm{F}$.
: Dispose of contents and container in accordance with all local, regional, national and international regulations.
: None known.

## Section 3. Composition/information on ingredients

| Substance/mixture | $:$ Mixture |
| :--- | :--- |
| Other means of <br> identification | : Not available. |

## CAS number/other identifiers

CAS number
: Not applicable.

| Ingredient name | $\%$ | CAS number |
| :--- | :--- | :--- |
| 9-Decenamide, N,N-dimethyl- | $\geq 3-\leq 5$ | $1356964-77-6$ |
| (R)-p-mentha-1,8-diene | $\geq 1-\leq 3$ | $5989-27-5$ |
| 2-Aminoethanol | $\geq 1-\leq 2.5$ | $141-43-5$ |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.
There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

## Description of necessary first aid measures

Eye contact

Inhalation

Skin contact
: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 20 minutes. Get medical attention.
: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
: Wash with plenty of soap and water. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 20 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Section 4. First aid measures

| Ingestion | : Wash out mouth with w <br> keep at rest in a position <br> the exposed person is c <br> exposed person feels sic <br> unless directed to do so <br> kept low so that vomit d <br> effects persist or are se <br> If unconscious, place in <br> Maintain an open airway |
| :--- | :--- |
| Most important symptoms/effects, acute and delayed |  |

| Eye contact | $:$ Causes serious eye irritation. |
| :--- | :--- |
| Inhalation | : No known significant effects or critical hazards. |
| Skin contact | : Causes skin irritation. May cause an allergic skin reaction. |
| Ingestion | : No known significant effects or critical hazards. |

Over-exposure signs/symptoms

| Eye contact | $:$Adverse symptoms may include the following: <br> pain or irritation <br> watering <br> redness <br> Inhalation <br> Skin contact |
| :--- | :--- |
| : No known significant effects or critical hazards. |  |
| IngestionAdverse symptoms may include the following: <br> irritation <br> redness |  |
| : No known significant effects or critical hazards. |  |

Indication of immediate medical attention and special treatment needed, if necessary
Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments : No specific treatment.
Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

## Extinguishing media

Suitable extinguishing media Unsuitable extinguishing media

Specific hazards arising from the chemical
: Use an extinguishing agent suitable for the surrounding fire.
: None known.
: Extremely flammable aerosol. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Gas may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back, causing fire or explosion. Bursting aerosol containers may be propelled from a fire at high speed. Runoff to sewer may create fire or explosion hazard. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

## Section 5. Fire-fighting measures

Hazardous thermal
decomposition products

Special protective actions for fire-fighters
Special protective equipment for fire-fighters
: Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides
: Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel
: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. In the case of aerosols being ruptured, care should be taken due to the rapid escape of the pressurized contents and propellant. If a large number of containers are ruptured, treat as a bulk material spillage according to the instructions in the clean-up section. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. U.S.A. regulations may require reporting spills of this material that could reach any surface waters. Report spills to all applicable Federal, State, Provincial and local authorities and/or the United States National Response Center at (800) 424-8802 as appropriate or required.

## Methods and materials for containment and cleaning up

Small spill

Large spill
: Stop leak if without risk. Move containers from spill area. Absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
: Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

## Precautions for safe handling

Protective measures

Advice on general occupational hygiene
: Put on appropriate personal protective equipment (see Section 8). Do not reuse container.
: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures.

## Section 7. Handling and storage

Conditions for safe storage, : Store in accordance with local regulations. Store in original container protected from including any incompatibilities direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from acids. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

## Section 8. Exposure controls/personal protection

## Control parameters

Occupational exposure limits

| Ingredient name | Exposure limits |
| :--- | :--- |
| 9-Decenamide, N,N-dimethyl- | None. |
| (R)-p-mentha-1,8-diene | None. |
| 2-Aminoethanol | ACGIH TLV (United States, 3/2015). |
|  | TWA: 3 ppm 8 hours. |
|  | TWA: $7.5 \mathrm{mg} / \mathrm{m}^{3} 8$ hours. |
|  | STEL: 6 ppm 15 minutes. |
|  | STEL: $15 \mathrm{mg} / \mathrm{m}^{3} 15$ minutes. |
|  | NIOSH REL (United States, 10/2013). |
|  | TWA: 3 ppm 10 hours. |
|  | TWA: $8 \mathrm{mg} / \mathrm{m}^{3} 10$ hours. |
|  | STEL: 6 ppm 15 minutes. |
|  | STEL: $15 \mathrm{mg} / \mathrm{m}^{3} 15$ minutes. |
|  | OSHA PEL (United States, 2/2013). |
|  | TWA: 3 ppm 8 hours. |
|  | TWA: $6 \mathrm{mg} / \mathrm{m}^{3} 8$ hours.. |

Appropriate engineering controls
Environmental exposure controls
: The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

## Individual protection measures

| Hygiene measures | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
| :---: | :---: |
| Eye/face protection | Wear eye protection such as safety glasses, chemical goggles, or face shields if engineering controls or work practices are not adequate to prevent eye contact. |
| Skin protection |  |
| Hand protection | : Use nitrile or oil resistant gloves. |
| Body protection | Personal protective clothing such as gloves, aprons, boots and complete facial protection should be selected based on the task being performed and the risks involved. Users should determine acceptable performance characteristics of protective clothing. Consider physical requirements and other substances present when selecting protective clothing. |
| Other skin protection | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved. |
| Respiratory protection | If a risk assessment indicates that respiratory protection is required, use a properly fitted, air-purifying or supplied air respirator that complies with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. |

## Section 9. Physical and chemical properties

| Appearance |  |
| :---: | :---: |
| Physical state | Liquid. [Clear.] |
| Color | Clear to light yellow. |
| Odor | Citrus. |
| Odor threshold | Not available. |
| pH | 10.4 to 11.5 |
| Melting point | Not available. |
| Boiling point | Not available. |
| Flash point | Closed cup: $63.9^{\circ} \mathrm{C}\left(147^{\circ} \mathrm{F}\right)$ |
| Evaporation rate | Not available. |
| Flammability (solid, gas) | Not available. |
| Lower and upper explosive (flammable) limits | Not available. |
| Vapor pressure | Not available. |
| Vapor density | Not available. |
| Relative density | 1.029 |
| Solubility | Emulsifiable. |
| Partition coefficient: noctanol/water | Not available. |
| Auto-ignition temperature | Not available. |
| Decomposition temperature | Not available. |
| Volatility | Negligible. |
| Viscosity | Not applicable. |
| VOC content | 3 to 4 \% (w/w) |

## Section 10. Stability and reactivity

## Reactivity

Chemical stability

Possibility of hazardous reactions

Conditions to avoid : Avoid all possible sources of ignition (spark or flame).

Incompatible materials products
: Reactive or incompatible with the following materials: Strong oxidizing agents.

Hazardous decomposition : Under normal conditions of storage and use, hazardous decomposition products should
: No specific test data related to reactivity available for this product or its ingredients.
: Stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.
: Under normal conditions of storage and use, hazardous reactions will not occur. not be produced.

## Section 11. Toxicological information

## Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
| :--- | :--- | :--- | :--- | :--- |
| (R)-p-mentha-1,8-diene | LD50 Dermal | Rabbit | $>5000 \mathrm{mg} / \mathrm{kg}$ | - |
| 2-Aminoethanol | LD50 Oral | Rat | $4400 \mathrm{mg} / \mathrm{kg}$ | - |
|  | LD50 Oral | $1720 \mathrm{mg} / \mathrm{kg}$ | - |  |

## Section 11. Toxicological information

## Mobility in soil

Soil/water partition : Not available.
coefficient (Koc)

Other adverse effects : No known significant effects or critical hazards.

## Section 13. Disposal considerations

Disposal methods
: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling empty containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information
